List of tables	VI
Foreword	VIII
Preface	IX
Acknowledgments	XII
About the authors	XIII
List of abbreviations	XIV
Part 1 Introducing land administration	2
Chapter 1 Setting the scene	4
1.1 Integrated land administration	5
1.2 Why build a land administration system?	15
1.3 The changing nature of land administration systems	26
1.4 Land reform	29
1.5 Good governance	30
1.6 Ten principles of land administration	33
Chapter 2 People and land administration	36
2.1 People and land	37
2.2 Historical evolution	58
Part 2 A new theory	68
Chapter 3 The discipline of land administration	70
3.1 Evolution of land administration as a discipline	71
3.2 Land administration and sustainable development	84
3.3 Incorporation of restrictions and responsibilities in LAS	88
Chapter 4 Land administration processes	94
4.1 Importance of land administration processes	95
4.2 Core land administration processes	97
4.3 Examples of tenure processes	99
4.4 Reforming LAS by improving process management	112
Chapter 5 Modern land administration theory	114
5.1 Designing LAS to manage land and resources	115
5.2 The cadastre as an engine of LAS	127

Part 3 Building modern systems	134
Chapter 6 Building land markets	136
6.1 A land administration view of land markets	137
6.2 Building infrastructure to support formal markets	150
6.3 Land valuation and taxation	163
Chapter 7 Managing the use of land	170
7.1 Land use	171
7.2 Planning control systems	176
7.3 Urban land-use planning and regulations	179
7.4 Rural planning and sectoral land-use regulations	185
7.5 Land consolidation and readjustment	189
7.6 Integrated land-use management	192
7.7 Land development	194
Chapter 8 Marine administration	204
8.1 The need to improve marine administration	205
8.2 Challenges in building marine administration systems	206
8.3 Existing marine administration	207
8.4 The marine cadastre concept	210
8.5 Marine registers	214
8.6 Developing a marine SDI	216
8.7 Using the land management paradigm to meet marine needs	222
Chapter 9 SDIs and technology	224
9.1 Why do land administration systems need an SDI?	225
9.2 Introducing the SDI	229
9.3 Integrating information about the natural and built environments	233
9.4 Making ICT choices	238
9.5 Land administration and cadastral data modeling	256
9.6 Maintaining momentum	261
Chapter 10 Worldwide land administration activities	262
10.1 Land administration projects	263
10.2 Recent land administration and cadastral activities	269
10.3 The Worldwide Cadastral Template Project	271
10.4 Improving capacity to make global comparisons	290

Part 4 Implementation	292
Chapter 11 Capacity building and institutional development	294
11.1 The modern capacity-building concept	296
11.2 Capacity development	297
11.3 Capacity-building issues in land administration	301
11.4 Institutional capacity in land management	303
11.5 Education and training in land administration	307
Chapter 12 The land administration toolbox	314
12.1 Using land administration tools	315
12.2 General tools	320
12.3 Professional tools	333
12.4 Emerging tools	387
Chapter 13 Project management and evaluation	402
13.1 Project context	403
13.2 Designing and building land administration systems	404
13.3 Evaluating and monitoring land administration systems	429
Part 5 The future of land administration	434
Chapter 14 Future trends	436
14.1 The land administration journey	437
14.2 LAS supporting sustainable development	439
14.3 LAS to support spatially enabled society	440
14.4 LAS issues in the next decade	443
14.5 The challenges ahead	445
Glossary	448
Reference list	458
Index	472
