Preface ix
Acknowledgments xi

Part 1 ***Using and making maps***

Chapter 1: Introduction 1
Tutorial 1-1 Open and save a map document 2
Tutorial 1-2 Work with map layers 5
Tutorial 1-3 Navigate in a map document 13
Tutorial 1-4 Measure distances 21
Tutorial 1-5 Work with feature attributes 23
Tutorial 1-6 Select features 27
Tutorial 1-7 Work with attribute tables 33
Tutorial 1-8 Label features 40
Assignment 1-1 43
Assignment 1-2 45

Chapter 2: Map design 47
Tutorial 2-1 Create choropleth maps 48
Tutorial 2-2 Create group layers 52
Tutorial 2-3 Set threshold scales for dynamic display 58
Tutorial 2-4 Create choropleth maps using custom attribute scales 63
Tutorial 2-5 Create point maps 69
Tutorial 2-6 Create a point map based on a definition query 71
Tutorial 2-7 Create hyperlinks 77
Tutorial 2-8 Create MapTips 81
Assignment 2-1 82
Assignment 2-2 84

Chapter 3: GIS outputs 87
Tutorial 3-1 Explore interactive GIS 88
Tutorial 3-2 Create map layouts 91
Tutorial 3-3 Reuse a custom map layout 98
Tutorial 3-4 Create a custom map template with two maps 100
Tutorial 3-5 Add a report to a layout 104
Tutorial 3-6 Add a graph to a layout 109
Tutorial 3-7 Create multiple output pages 111
Tutorial 3-8 Build a map animation 114
Assignment 3-1 119
Assignment 3-2 120
Assignment 3-3 122

Part 2 Working with spatial data

Chapter 4: File geodatabases 125

Tutorial 4-1 Build a file geodatabase 126
Tutorial 4-2 Use ArcCatalog utilities 128
Tutorial 4-3 Modify an attribute table 131
Tutorial 4-4 Join tables 134
Tutorial 4-5 Create centroid coordinates in a table 136
Tutorial 4-6 Aggregate data 140
Assignment 4-1 146
Assignment 4-2 149

Chapter 5: Spatial data 151

Tutorial 5-1 Examine metadata 152
Tutorial 5-2 Work with map projections 154
Tutorial 5-3 Learn about vector data formats 164
Tutorial 5-4 Explore sources of vector maps 171
Tutorial 5-5 Download and process tabular data 176
Tutorial 5-6 Explore sources of raster maps 182
Assignment 5-1 188
Assignment 5-2 190

Chapter 6: Digitizing 193

Tutorial 6-1 Digitize polygon features 194
Tutorial 6-2 Use advanced edit tools 204
Tutorial 6-3 Digitize point features 209
Tutorial 6-4 Digitize line features 213
Tutorial 6-5 Spatially adjust features 218
Assignment 6-1 226
Assignment 6-2 228

Chapter 7: Geocoding 231

Tutorial 7-1 Geocode data by ZIP Code 232
Tutorial 7-2 Geocode data by street address 238
Tutorial 7-3 Correct source addresses using interactive rematch 244
Tutorial 7-4 Correct street reference layer addresses 247
Tutorial 7-5 Use an alias table 252
Assignment 7-1 253
Assignment 7-2 255

Chapter 8: Geoprocessing 257
Tutorial 8-1 Use data queries to extract features 258
Tutorial 8-2 Clip features 262
Tutorial 8-3 Dissolve features 265
Tutorial 8-4 Merge features 269
Tutorial 8-5 Intersect layers 271
Tutorial 8-6 Union layers 275
Tutorial 8-7 Automate geoprocessing with ModelBuilder 277
Assignment 8-1 287
Assignment 8-2 289
Assignment 8-3 291

Part 3 Learning advanced GIS applications

Chapter 9: Spatial analysis 295
Tutorial 9-1 Buffer points for proximity analysis 296
Tutorial 9-2 Conduct a site suitability analysis 300
Tutorial 9-3 Apportion data for noncoterminous polygons 307
Assignment 9-1 317
Assignment 9-2 320
Assignment 9-3 322

Chapter 10: ArcGIS 3D Analyst 325
Tutorial 10-1 Create 3D scenes 326
Tutorial 10-2 Create a TIN from contours 328
Tutorial 10-3 Drape features onto a TIN 332
Tutorial 10-4 Navigate through scenes 336
Tutorial 10-5 Create a fly-through animation 340
Tutorial 10-6 Add 3D effects and use 3D symbols 342
Tutorial 10-7 Edit 3D objects 345
Tutorial 10-8 Perform a line-of-sight analysis 349
Tutorial 10-9 Explore ArcGlobe Web service 351
Assignment 10-1 355
Assignment 10-2 357

Chapter 11: ArcGIS Spatial Analyst 359

Tutorial 11-1 Process raster map layers 360
Tutorial 11-2 Create a hillshade raster layer 364
Tutorial 11-3 Make a kernel density map 366
Tutorial 11-4 Extract raster value points 370
Tutorial 11-5 Conduct a raster-based site suitability study 373
Tutorial 11-6 Use ModelBuilder for a risk index 378
Assignment 11-1 387
Assignment 11-2 389

Appendix A Task index 391
Appendix B Data source credits 397
Appendix C Data license agreement 407
Appendix D Installing the data and software 411
