Preface ix
Acknowledgments x
Introduction xi
Workflow xxi

Module 1: Enhancing images 2

Project 1: Displaying and enhancing Landsat imagery of the Chesapeake Bay 4
Project 2: Displaying and enhancing Landsat imagery of Las Vegas, Nevada 24
Project 3: On your own 30

Module 2: Composite images 32

Project 1: Creating multispectral imagery of the Chesapeake Bay 34
Project 2: Creating multispectral imagery of Las Vegas, Nevada 49
Project 3: On your own 53

Module 3: Spectral signatures 56

Project 1: Investigating spectral signatures of the Chesapeake Bay 58
Project 2: Investigating spectral signatures of Las Vegas, Nevada 71
Project 3: On your own 76

Module 4: Land cover 78

Project 1: Comparing digitized land cover to USGS land-cover classes in Loudoun County, Virginia 80
Project 2: Comparing digitized land cover to USGS land-cover classes near Lake Mohave 93
Project 3: On your own 98

Module 5: Unsupervised classification 100

Project 1: Calculating unsupervised classification of the Chesapeake Bay 102
Project 2: Calculating unsupervised classification of Las Vegas, Nevada 115
Project 3: On your own 121

Module 6: Supervised classification 124

Project 1: Calculating supervised classification of the Chesapeake Bay 126
Project 2: Calculating supervised classification of Las Vegas, Nevada 143
Project 3: On your own 150

Module 7: Classification accuracy 152

Project 1: Assessing the accuracy of land-cover data and different types of classification of the Chesapeake Bay 154

Project 2: Assessing the accuracy of land-cover data and different types of classification of Las Vegas, Nevada 166

Project 3: On your own 170

Module 8: Urban change 172

Project 1: Measuring urban change in Loudoun County, Virginia 174

Project 2: Measuring urban change in Las Vegas, Nevada 182

Project 3: On your own 186

Module 9: Water 188

Project 1: Measuring the impact of drought on Texas reservoirs 190

Project 2: Measuring Minnesota lake temperature using thermal infrared data 201

Project 3: On your own 208

Module 10: Normalized Difference Vegetation Index 210

Project 1: Using NDVI to study drought conditions in Texas 212

Project 2: Using NDVI to study seasonal change in Minnesota 223

Project 3: On your own 228

Appendix A: Downloading Landsat imagery 230

Appendix B: References 232

Appendix C: Image and data credits 234

Appendix D: Data license agreement 256

Appendix E: Installing the data and software 260
