

Getting to Know ArcObjects

Workbook Updates for ArcGIS 9.3 Compatibility

A version 9.3 user interface change to ArcMap directly affects the book's exercise steps. Before 9.3 ArcMap's View menu contained a choice called Bookmarks. At 9.3 Bookmarks is its own menu and is no longer found under the View menu.

Currently many steps read: "Click the View menu, point to Bookmarks, and click ..."

For 9.3 these steps should read: "Click the Bookmarks menu and click ..."

Here is a list of page and step numbers affected and their correct instruction for 9.3.

Page 84 Step 13

Click the Bookmarks menu and click Holy Name College.

Page 95 Step 22

In ArcMap, click the Bookmarks menu and click Howard University to zoom to it.

Page 207 Step 12

Users may encounter an "Unable to display help" error. This is due to the absence of the Desktop Software Developer Kit. Workaround: Instead of pressing F1 to bring up the ArcGIS Developer Help, users can search the Online Developer Help at the following link:

<http://resources.esri.com/arcgisdesktop/index.cfm?fa=forDevelopers>
