Introduction to the Multiuser Geodatabase
CONTENTS

1 Introduction
   Welcome to Introduction to the Multiuser Geodatabase 1-1
   Course objectives 1-2
   Day 1 course content 1-3
   Day 2 course content 1-4
   Course materials 1-5
   Additional resources 1-6
   ESRI Support Center 1-7
   ArcGIS: A complete GIS 1-8
   Logistics 1-9
   Introductions 1-10
   Exercise goals 1-11

2 Geodatabase basics
   Geodatabase basics 2-1
   Learning objectives 2-2
   Defining the geodatabase 2-3
   Geodatabase elements 2-4
   Geodatabase options 2-5
   ArcGIS Desktop geodatabases 2-6
   ArcGIS Desktop licensing 2-7
   ArcGIS Server licensing 2-8
   ArcSDE geodatabase benefits 2-9
   ArcSDE geodatabase editions 2-10
   Interacting with a multiuser geodatabase 2-11
   Class configuration 2-12
   Lesson review 2-13

3 Exploring and connecting to the geodatabase
   Making geodatabase connections 3-1
   Learning objectives 3-2
   ArcGIS connection types 3-3
   OLE DB connection 3-4
   ArcSDE technology client-server model 3-5
   Creating a spatial database connection 3-6
   Client and server compatibility 3-7
   Client spatial connection considerations 3-8
   Geodatabase permissions 3-9
   Connection files 3-10
   Enterprise geodatabase security consideration 3-11
| Exercise goals | 3-12 |
| Lesson review  | 3-13 |

### 4 Exploring geodatabase components
- Exploring geodatabase components
- Learning objectives
- Geodatabase properties and behavior
- ArcSDE feature class
- Feature class overview: SDEBINARY format
- Spatial index
- Feature datasets
- Spatial reference
- Coordinate systems
- Required spatial reference components
- Raster data
- Raster dataset schema overview
- Raster data in the geodatabase
- Managing raster catalogs in ArcCatalog
- Raster attributes
- Loading data into a geodatabase
- Moving data between geodatabases
- Privileges
- Exercise goals
- Lesson review

### 5 Optimizing client-side performance
- Optimizing client-side performance
- Learning objectives
- Performance bottlenecks
- Application optimization overview
- Thumbnails in ArcCatalog
- ArcMap tips
- Scale-dependent layers
- Definition query
- Overview and Magnifier windows
- Spatial bookmarks
- My Places
- Annotation and labeling
- Symbology
- Edit performance tips
- ArcMap map cache
- Performance benefits of map cache
- Maintaining performance
- Exercise goals
Lesson review 5-19

6 Editing concepts
   Editing concepts 6-1
   Learning objectives 6-2
   Historical GIS data editing 6-3
   Editing in a geodatabase 6-4
   Editing in a multiuser geodatabase 6-5
   Overview of non-versioned editing 6-6
   Overview of versioned editing 6-7
   Working with versions 6-8
   Definition: Version 6-9
   Version permissions 6-10
   Examples of versioning workflows 6-11
   Overview of geodatabase archiving 6-12
   Geodatabase replication and versioning 6-13
   Exercise goals 6-14
   Lesson review 6-15

7 Non-versioned and versioned editing in ArcMap
   Non-versioned and versioned editing in ArcMap 7-1
   Learning objectives 7-2
   Overview of non-versioned editing 7-3
   Editing in a non-versioned environment 7-4
   No undo/redo 7-5
   Non-versioned editing workflow considerations 7-6
   Overview of versioned editing 7-7
   Making versioned edits 7-8
   How versioned edits are stored 7-9
   Multiuser editing in the same version 7-10
   Conflict detection 7-11
   Conflict detection options 7-12
   Conflict resolution options 7-13
   Saving after auto reconcile 7-14
   Reviewing conflicts 7-15
   Viewing conflict choices 7-16
   Conflict resolution alternatives 7-17
   Register as versioned with move to base option 7-18
   Move to base editing overview 7-19
   ArcSDE geodatabase editing options 7-20
   Exercise goals 7-21
   Lesson review 7-22
8 Merging versions
   Merging versions 8-1
   Learning objectives 8-2
   Version Manager 8-3
   Creating versions 8-4
   Creating versions 8-5
   Merging versions overview 8-6
   Reconcile operation 8-7
   Resolving conflicts between versions 8-8
   Post 8-9
   Workflow example: Part 1 8-10
   Workflow example: Part 2 8-11
   Workflow example: Part 3 8-12
   Workflow example: Part 4 8-13
   Aborting reconciles 8-14
   Failure to reconcile or post 8-15
   Merging protected versions 8-16
   Deleting versions 8-17
   Exercise goals 8-18
   Lesson review 8-19

9 Introducing geodatabase replication
   Introducing geodatabase replication 9-1
   Learning objectives 9-2
   Replicating data 9-3
   Introducing geodatabase replication 9-4
   Types of replication 9-5
   Fundamentals of geodatabase replication 9-6
   Synchronization 9-7
   Checkout/check-in replica type overview 9-8
   Checking out data to edit 9-9
   Checkout process 9-10
   Checkout version in a parent geodatabase 9-11
   Checking out to an ArcSDE geodatabase 9-12
   Permissions required 9-13
   Schema changes 9-14
   Check-in process 9-15
   Check-in options 9-16
   System cleanup 9-17
   Exercise goals 9-18
   Lesson review 9-19

10 Implementing desktop and workgroup geodatabases (Optional)
   Implementing desktop and workgroup geodatabases (Optional) 10-1
Learning objectives 10-2  
Background: Installation 10-3  
Software authorization 10-4  
Database server connections 10-5  
Desktop and workgroup administration 10-6  
Adding users to the database server 10-7  
Managing permissions 10-8  
Backup and restore 10-9  
Detach 10-10  
Attach 10-11  
Geodatabase maintenance 10-12  
Comparison of administrator activities 10-13  
Upgrade geodatabase 10-14  
Exercise goals 10-15  
Lesson review 10-16

11  
Course conclusion 11-1  
Course objectives 11-2  
ESRI educational support 11-3  
Where do you go from here? 11-4  
Learning pathways 11-5  
Course evaluation 11-6  
Thank you for attending 11-7
