C O N T E N T S

1 *Introduction*

- Welcome to ArcGIS Server Enterprise Configuration and Tuning for SQL Server
- Welcome to Esri Training
- ArcGIS Resource Center
- The ArcGIS system
- ArcGIS Desktop
- ArcGIS Server
- ArcGIS for developers
- ArcGIS Online
- Course introduction
- Course objectives
- Course content
- Course materials
- Exercise goals

2 *Introduction to the enterprise geodatabase*

- Introduction to the enterprise ArcSDE geodatabase
- Learning objectives
- Defining the geodatabase
- Geodatabase elements
- Geodatabase options
- ArcGIS file based geodatabases
- ArcSDE geodatabase benefits
- ArcSDE geodatabases
- Administering a multiuser geodatabase
- Connecting to a multiuser geodatabase
- ArcGIS Desktop licensing
- Class configuration
- Lesson review

3 *Configuring SQL Server for ArcSDE*

- Configuring SQL Server for ArcSDE
- Learning objectives
- SQL Server components
- SQL Server instance name
- Memory considerations
- SQL Server databases
- Database and data files
- Transaction log
- File groups

- Summary of database storage
- Authentication
- SQL Server security
- Fixed roles
- Statement permissions
- Object permissions
- Database initialization parameters
- SQL Server Management Studio
- Management Studio components
- Exercise goals
- Lesson review

4 *Installing ArcSDE*

- Installing ArcSDE
- Learning objectives
- Installing ArcSDE overview
- SDEHOME directory
- Post installation overview
- Choose schema
- User authentication for installation
- Create spatial database
- ArcSDE repository setup
- ArcSDE configuration files
- Authorize software
- Create ArcSDE service
- ArcSDE service name and port
- giomgr process
- Start and stop ArcSDE
- Single database model
- Exercise goals
- Lesson review

5 *Understanding ArcSDE components*

- Understanding ArcSDE components
- Learning objectives
- ArcSDE repository
- ArcSDE data dictionary
- Stored procedures
- Contents of SDEHOME
- ArcSDE binary files
- ArcSDE command syntax
- sdeservice command
- sdemon command
- Configuration files (SDEHOME\etc)

- Server configuration files
- Service configuration files
- ArcSDE diagnostic files
- Upgrade components
- Client and server compatibility
- Exercise goals
- Lesson review

6 *Exploring ArcSDE architecture and connections*

- Exploring ArcSDE architecture and connections
- Learning objectives
- ArcSDE client/server model
- Application server connection
- Application server connection life cycle
- Direct connect
- Role of ArcSDE technology
- Creating application server connections
- Creating direct connections
- Creating OLE DB connections
- Windows authentication
- Connecting DBO schema
- Monitoring connections
- ArcSDE connection information
- Terminating connections
- SDE_server_config table
- Modifying the SDE_SERVER_CONFIG table
- SDE_SERVER_CONFIG parameters
- Exercise goals
- Lesson review

7 *Managing vector storage*

- Managing vector storage
- Learning objectives
- ArcSDE feature class basics
- ArcSDE compressed binary schema
- Spatial index concepts
- Supporting objects for feature class tables
- SDE_LAYERS table
- Table registry
- Controlling storage
- Controlling geometry storage
- dbtune file format
- dbtune parameters
- Feature class parameters

SQL Server file group examples
Exercise goals
Lesson review

8 *Creating SQL Server Spatial feature classes*

Creating SQL Server Spatial feature classes
Learning objectives
Using SQL Server Spatial with ArcSDE
SQL Server 2008 Spatial Type
Comparing geography and geometry
Loading
Loading errors with geography data
Spatial index
Spatial index options
ArcGIS and the spatial index
Building the spatial index with SQL Server
Using geography or geometry data
Exercise goals
Lesson review

9 *Managing an editing environment*

Managing an editing environment
Learning objectives
Workflow must be considered
Non-versioned editing overview
Database locking and concurrency
Transaction isolation levels
Versioning overview
Definitions: Version and State
How versioning works
Repository versioning tables
User versioning tables
Versioned editing example: INSERT
Versioned editing example: DELETE
Versioned editing example: UPDATE
Versioned editing example: Save
Versioned editing example: Compress
Delta table storage
Indexes and statistics
DBMS replication
Geodatabase replication
Overview of geodatabase replication
Types of geodatabase replication
Exercise goals

Lesson review

10 Managing raster storage

Managing raster storage

Learning objectives

ArcSDE raster dataset basics

ArcSDE raster organization

Raster storage in SQL Server

Binary raster dataset schema overview

ST_raster dataset schema overview

Raster repository tables

Raster storage parameters

Pyramids

Pyramid overhead

Compression

Calculating raster storage

Estimating space usage example

Workflow considerations for loading

Configuring SQL Server for raster loading

Exercise goals

Lesson review

11 Recovering data

Recovering data

Learning objectives

Data backups

Choosing a backup type

ArcSDE backup considerations

SQL Server backup options

Recovery model

Simple recovery model

Full recovery model

Bulk-logged recovery model

Restoring a database depends on

Restore

Detaching a database

Attaching a database

Scale up to enterprise

Recommendations for geodatabases

Exercise goals

Lesson review

12 *Course conclusion*
Course conclusion
