Data Management in the Multiuser Geodatabase
U. S. GOVERNMENT RESTRICTED/LIMITED RIGHTS
Any software, documentation, and/or data delivered hereunder is subject to the terms of the License Agreement. The commercial license rights in the License Agreement strictly govern Licensee's use, reproduction, or disclosure of the software, data, and documentation. In no event shall the U.S. Government acquire greater than RESTRICTED/LIMITED RIGHTS. At a minimum, use, duplication, or disclosure by the U.S. Government is subject to restrictions as set forth in FAR §52.227-14 Alternates I, II, and III (DEC 2007); FAR §52.227-19(b) (DEC 2007) and/or FAR §12.211/12.212 (Commercial Technical Data/Computer Software); and DFARS §252.227-7015 (NOV 1995) (Technical Data) and/or DFARS §227.7202 (Computer Software), as applicable. Contractor/Manufacturer is Esri, 380 New York Street, Redlands, CA 92373-8100 USA.
CONTENTS

1 Introduction
   Welcome to Data Management in the Multiuser Geodatabase
   Welcome to Esri Training
   ArcGIS Resource Center
   The ArcGIS system
   ArcGIS Desktop
   ArcGIS Server
   ArcGIS for developers
   ArcGIS Online
   Course introduction
   Course goals
   Day 1 course content
   Day 2 course content
   Day 3 course content
   Course materials
   Exercise goals

2 Exploring the geodatabase
   Exploring the geodatabase
   Learning objectives
   Defining the geodatabase
   Classifying geodatabase data
   Geodatabase behavior
   Examples of attribute behavior
   Examples of spatial behavior
   Geodatabase options
   ArcGIS file-based geodatabases
   ArcSDE geodatabase benefits
   ArcSDE geodatabases
   Class configuration
   Exercise goals
   Lesson review

3 Exploring geodatabase architecture
   Exploring geodatabase architecture
   Learning objectives
   Client server model
   Introducing multitier architecture
   Multitier architecture: ArcObjects
   Multitier architecture: ArcSDE
Multitier architecture: DBMS
Enterprise ArcSDE geodatabase installation
Post installation steps
Multiple enterprise geodatabases
ArcSDE for SQL Server Express installation
Management tool: ArcCatalog
Management tool: ArcSDE commands
Management tool: DBMS
Exercise goals
Lesson review

4 Creating geodatabase connections
Creating geodatabase connections
Learning objectives
Introducing connection types
Application server connection
Direct connection
OLE DB connection
Authentication
Creating an application server connection
Creating a direct connection to SQL Server
Creating a direct connection to DB2 or Informix
Creating a direct connection to Oracle
Creating a database server connection
Supported connection types
ArcGIS client connection files
Connection information
Authorizing ArcSDE geodatabase access
Exercise goals
Lesson review

5 Users and permissions
Users and permissions
Learning objectives
Geodatabase users
Levels of access – access to the DBMS
Levels of access – access to the data
Geodatabase users – detail
Data owner
ArcSDE administrative user
ArcSDE administrative user for SQL Server
ArcSDE administrative user for Oracle
Data permissions
Permissions in ArcSDE for SQL Server Express
6 Loading data
   Loading data
   Learning objectives
   Prerequisites
   Considerations for creating data
   Geodatabase environment settings
   Specifying environment settings
   Methods of creating data
   ArcGIS tools for data creation
   Using ArcSDE commands
   Using ModelBuilder
   Loading data
   Configuration keywords
   After loading data
   Deleting geodatabase data
   Exercise goals
   Lesson review

7 Managing vector data
   Managing vector data
   Learning objectives
   Feature class properties
   Spatial reference properties
   XY resolution (precision)
   Upgrading data from pre-9.2 releases
   XY tolerance
   Z and M values
   Spatial reference in ArcMap
   Geodatabase field types
   Geometry storage
   ArcSDE SDEBINARY
   ArcSDE ST_Geometry
   DMBS spatial column type
   Layers table
   Spatial references
   Table registry
   Query layers
   Exercise goals
   Lesson review
Chapter 8

Examining indexes

- Examining indexes
- Learning objectives
- Query filters
- Use of query filters in ArcGIS
- Attribute indexes
- Adding an attribute index
- Considerations for index creation
- ArcSDE indexes
- Spatial index queries
- Spatial index types
- Multiple grid sizes
- SDEBINARY and ST_Geometry grid index size
- Altering spatial grid index
- Exercise goals
- Lesson review

Chapter 9

Managing raster data

- Managing raster data
- Learning objectives
- Raster data types
- Raster datasets
- Binary raster dataset schema overview
- ST_Raster dataset schema overview
- Georaster dataset schema overview
- Raster attribute table
- Pyramids
- Pyramid resampling methods
- Compression
- Compression options
- Color maps
- Creating raster datasets with color maps
- Raster tiles
- NODATA storage
- Raster statistics
- Raster geodatabase settings
- Exercise goals
- Lesson review

Chapter 10

Organizing multiple raster datasets

- Organizing multiple raster datasets
- Learning objectives
- Raster organization
- Mosaicking raster datasets
Mosaicking options
Mosaic datasets
Building mosaic datasets
Raster catalogs
Raster catalog options
Raster dataset options
Mosaic dataset versus raster catalog
Tips for loading multiple rasters
Raster attributes
Exercise goals
Lesson review

11 Editing: Geodatabase basics
Editing: Geodatabase basics
Learning objectives
Multiuser geodatabase editing
Transaction models
Overview of non-versioned editing
Non-versioned editing considerations
Locking scenario
Overview of versioned editing
Versioning use case scenarios
Versioned editing considerations
Overview of geodatabase archiving
Overview of geodatabase replication
Exercise goals
Lesson review

12 Understanding versioning concepts
Understanding versioning concepts
Learning objectives
Versioning overview
Registering object as versioned
Important versioning terms
How versioned edits are stored
Viewing the DEFAULT version
Viewing alternate versions
Viewing version differences
Merging changes: Reconcile and post
Resolving conflicts
Version permissions
Move to base option
Unregister as versioned
Exercise goals
Lesson review

13 Associating data
   Associating data
   Learning objectives
   Database normalization and cardinality
   Associating data in ArcGIS
   ArcMap joins and relates
   Geodatabase relationship class
   Views
   Uses for views
   ArcSDE spatial views
   Creating a spatial view
   Functional comparison of data associations
   Data associations processed by client
   Data associations processed by server
   Indexing relationships
   Exercise goals
   Lesson review

14 Maintaining performance: Best practices
   Maintaining performance: Best practices
   Learning objectives
   Performance Bottlenecks
   Maintaining performance overview
   Compress
   Successful compress
   Maintaining statistics
   Rebuilding indexes
   Enterprise statistics and indexes
   Generalizing data for rapid display
   ArcMap best practices for users
   Best practices for data managers
   ArcSDE locking mechanisms
   Determining lock information
   Exercise goals
   Lesson review

15 Course conclusion
   Course conclusion
   Course goals
   Esri training services
   Where do you go from here?
Course evaluation
Thank you
