Irrigation Data Model

Data Model User Group

Join the [data model user group](#) if you are an existing ArcGIS customer and want to learn more about design and architecture of personal or enterprise Geodatabase and become a part of Esri's growing data model community.

The vision for the ArcGIS Irrigation Data Model is to provide a generic template data model to the Irrigation District clients. ESRI has worked with Irrigation District user community to develop this data model.

At this point, the ArcGIS Irrigation Data Model is in pre-final release version. The model can be tailored to meet project requirements for data management and integration with other systems. ESRI expects the user community to download this ArcGIS Irrigation Data Model and provide comments for any model updates.

For more information contact [Lori Armstrong](#).

Downloads - Design Templates

The Design Templates are the result of the community-based design process. The general concepts and terms for this discipline are described here. Tools and examples to create a template data model are also included for advanced users.
